Farquhar's New Bindery

For thirteen years David Farquhar has been in the book binding business at the corner of Fair Oaks and Camp Streets, North Cambridge. He made rapid progress from the first, and his work is now to be seen in the public and private libraries of the United States. The old quarters proved too small, so a new fire-proof brick structure, with floors of artificial stone, and special fire-proof vaults are provided for safely storing books. It is lighted with gas and electricity, and has plate glass windows six feet high. No inflamable material is allowed to accumulate, and all waste is at once swept into a fire-proof vault beneath the building. It is one of the finest plants in the country.

INSTRUCTIONS TO KEY HOLDERS

Alarms to be given from the box nearest the location of the fire
Do not give an alarm for a fire seen at a distance unless assistance is called for

D. B. SHAUGHNESSY

Chairman Board of Assessors

TIMOTHY W. GOOD

Secretary Board of Assessors

F. B. PULLEN

Chief of Police

N. W. BUNKER

Chief of Fire Department

To give an alarm, open the door, pull the hook to the bottom of the slot once, and let go. Each box contains a small bell, which, if heard before you pull indicates that an alarm has been previously given, and by listening at the box, you will learn the number of box from which the alarm is given, but in no case will you pull the hook while the alarm is striking. After giving the alarm, remain at the box so as to direct the firemen to the fire. Be sure that you lock the box before leaving it.

Citizens are requested to inform themselves where keys to the signal boxes are kept, signs suitably inscribed being placed over each box giving the requisite information.

First alarm will be given by striking two or more rounds of box number.

Second alarm wil be given by striking three blows followed by box number

Third alarm will be given by striking three blows twice on gongs, bells and whistles.

General alarm will be given by striking three blows three times on gongs, bells and whistles.

THE INCOMPARABLE

WHITE

The Car for Service

Steam Power, as utilized in the White Car, possesses unique advantages. There is absolutely no noise, no odor, no vibration, and the speed of the car is controlled entirely by the throttle. The safety, simplicity and reliability of the system is demonstrated by the performance of the thousands of White Cars now in use.

Your Automobile Education is incomplete until you have had a ride in a WHITE STEAMER. In the Model "G" White will be noted not only increased seating capacity, increased power and considerable refinement in detail, but also an improved system of regulation which gives, under all conditions, UNIFORM PRESSURE WITH A UNIFORM DEGREE OF SUPERHEAT. Stated in other words, any driver who can steer a car and open and close a throttle, can secure the same results from both the model "G" and the model "H" White as can the most experienced operator who has driven White Cars for years.
